Phase

2

Beach Huts

(B1)

Through 'Expressive Arts and Design', children will have a range of materials to construct with and will be encouraged to work together to develop and realise creative ideas. Children will be taught different techniques for joining materials and how to use tools with care and precision. Through 'Physical Development', children will develop their fine motor skills by using a range of tools competently, safely and confidently. For example: threading and sewing, woodworking, pouring, stirring, using spray bottles, planting and caring for plants and making models with junk materials, construction kits and malleable materials like clay.
