The Nest Provision at Hunsbury Park

At our Hunsbury Park site we have four classes- Barn Owls, Woodpeckers, Robins and Wrens all are a mixture of reception, year one and two.

Our classes are organised by complexity of need and follow our Flightpath model- Sensory, Experiential and Targeted. We currently have two sensory classes and two experiential at our HPPS site.

At the end of year 2 all children transition to our Chiltern Primary site, following their Flightpath class.

All classes have a staffing model of 2 full-time Teaching Assistants and a Class Teacher. Dependent on the Flightpath, classes will have between 6-9 children.

Barn Owls

Woodpeckers

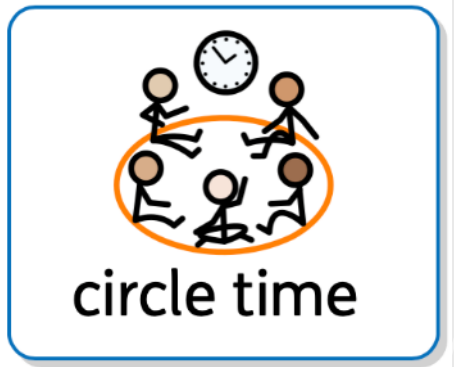
Robins

Wrens

The Nest is an integral part of the whole school.

Students enter through a separate entrance, allowing them to avoid our whole school community during busy parts of the day.

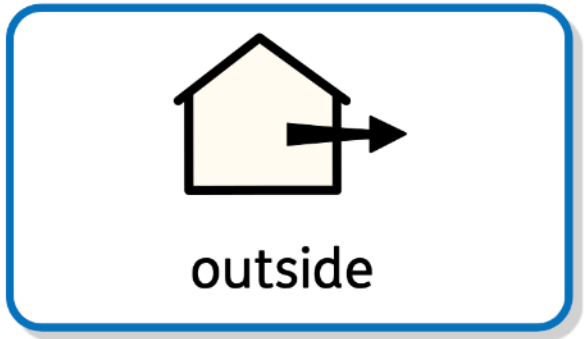
Students access resources around the mainstream provision such as the Library, Studio and Forest School areas.



Our classrooms are designed to be a distraction free and low arousal environment.

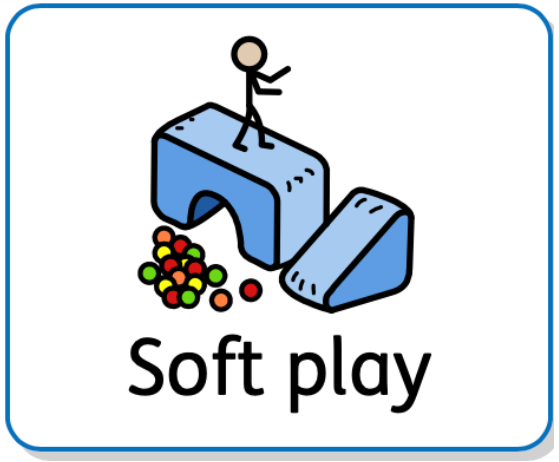
All classrooms have custom-made Teaching walls, which provide essential storage but also allow the front of our classrooms to be distraction free.

All classrooms within the provision follow the Teacch approach. Included within this approach is the use of workstations for students to complete individual tasks daily. Students also follow the visual structure of Teacch through personalised schedules (dependent on their needs.)



Every classroom benefits from an outside, break-out space.
These areas are used for number of different reasons such as curriculum, sensory and choosing activities.
They also provide a safe-place for our children to regulate.

Children across the provision are able to access our fully-immersive and interactive sensory room. The multi-media technology allows students to access interactive games, immerse themselves in a new environment .All classes have timetabled sessions in the sensory room.



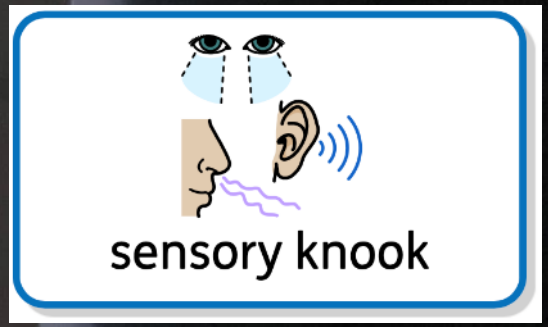
Soft-Play room

Our fully interactive soft-play room is a shared space available to all classes based at the Hunsbury Park site.
The soft-play room is used for whole class activities, small group work and 1.1 sensory activities.

playground

Our new playground has a rustic, forest school area which will be available for students to use at breaktimes and for curriculum activities.

sensory knook



Students are able to access our two sensory Knooks. These are interactive, moveable sensory spaces located in our Nest corridor. Students enjoy exploring the interactive panels, fibre optics and bubble tubes. Students are learning to request the Knooks during choosing time and when they need to regulate.

Many of our younger children need help with their personal care. We have two hygiene rooms within our provision to ensure that these needs can be met safely and privately.
